

◆ Task 1: if–else Statement

Title: Student Result Checker

Task:

Write a Java program to check whether a student has **passed or failed**.

- Input marks
 - If marks $\geq 40 \rightarrow$ **Pass**
 - Else $\rightarrow$ **Fail**
-

◆ Task 2: for Loop

Title: Number Table Generator

Task:

Write a Java program to print the **multiplication table of a given number** using a for loop.

Example (Input: 4):

4 x 1 = 4
4 x 2 = 8
...

◆ Task 3: while Loop

Title: Reverse Number

Task:

Write a Java program to **reverse a given number** using a while loop.

Example:

Input: 123
Output: 321

◆ Task 4: do-while Loop

Title: Password Validation

Task:

Write a Java program that **asks the user to enter a password**.

- Continue asking until the correct password is entered
 - Use a do-while loop
-

◆ Task 5: break Statement

Title: Search Number

Task:

Write a Java program to **search a number in an array**.

- If the number is found, display the position
- Use the break statement to stop the loop once found
